

KARNATAKA POLICE

FIRST INFORMATION REPORT

FIR No.: 0256/2024      Police Station: Whitefield

District: Bengaluru Urban      Under Sections: IT Act Sec. 66C, 66D

Date of Registration: 29 May 2024

Place of Occurrence: Bengaluru Tech Park

On 29 May 2024, a case was registered regarding a phishing operation targeting employees of technology firms. Victims received fraudulent login pages that imitated internal company portals. The stolen credentials were suspected to have been used for unauthorised access and financial fraud.

The inquiry identifies Lajita Chatterjee, Arjun Nair, Nisha Patel, and unknown technical associates. Device metadata and communication records suggest that the operation relied on temporary hosting services, prepaid mobile numbers, and short-lived payment accounts.

A photograph recovered during the investigation was associated with Lajita Chatterjee. The identity is not initially linked to other cases by the investigating team.

Financial evidence is limited but includes payments connected to domain registration, hosting services, and digital-wallet transfers.

Investigating Officer: Inspector R. K. Menon

Risk Level: High

Primary Entity: Lajita Chatterjee
